Soul Wings A Cappella Group is the first co-ed A Cappella group on campus. We sing contemporary pop and other genres of music using only our voices. Our mission is to encourage self-expression and to spread our love of music and making music with those around us, as well as to unite students on campus through the art of singing and to work together as a team to promote the mission of Soka University—and to sound great while doing so. One of our goals for the 2014-2015 academic year is to become more involved in the campus community and the community outside of Soka University. We want the campus to be as enthralled with A Cappella music as we are by spreading our passion for singing around. Through this, we also wish to promote the mission of Soka University and of Soul Wings to the off-campus community in Aliso Viejo and the greater Southern California region. Another one of our goals this year is to better equip our members with the knowledge and understandings of musical theory so they can sight read and match pitch with other singers with ease. You can contact our club by emailing us at soulwingsclub@soka.edu for further information on our club and what are are planning to do for this year. Thank you for your support.
